ACADEMIC PROJECTS

Mini-Projects

❖ **Website Homepage Clone**

- In the first year of college I cloned the home page of **Amazon Web Services (AWS)** and **Amazon Website**
- During Summer vacation I cloned the **Spotify Web Player's** homepage
- **Technologies** – HTML,CSS,Bootstrap.

❖ **Game & Apps**

- I developed **Simon Says game** , **Weather App,Image Album Viewer** as mini projects and used **Material UI** for small UI elements such as buttons,icons etc and **unsplash images** for beautiful images.
- **Technologies –** JavaScript , ReactJS

Full-Stack -Project

❖ **Wonderlust (Airbnb type Website) as group project**

- Created a full fleged responsive website named **Wonderlust** as a final year college project which offers the following features –

  Airbnb our properties, view listings, give reviews and also view on map it also includes the facility of login and signup.
- To develop this project, I took help from these websites -
  Font Awesome & Google fonts, Stack overflow, MDN Docs, Mongodb Docs for understanding implementation
- **Technologies** – HTML, CSS, Bootstrap, JavaScript, Nodejs, mongoDb, ExpressJS
